DO YOUR PART

A brighter smile for a better you

Here's how to keep your smile extra healthy (and your Four Ever Smile™ Lifetime Warranty intact):

- > Water floss twice a day on low setting
- > Brush your new teeth with a soft-bristled toothbrush and non-abrasive toothpaste at least twice a day.
- > Floss any natural teeth at least once a day (ideally after every meal) to combat bad breath, preserve your gums, and stop tooth decay
- > Rinse with antimicrobial mouthwash for that extra-clean sensation
- > Wear your night guard every night!

Yes, dental implants are durable, comfortable, and esthetically pleasing!

But are they indestructible? No. Avoid bad habits like smoking, nighttime teeth grinding, and hard candy. At your bi-yearly checkups, we want to see a smile that lasts a lifetime.
